Ahmedabad, Gujarat, India

Final year CS undergraduate (Minor: Adaptive AI, CGPA: 8.83) with production-level Java backend and full-stack development with hands-on AI/ML engineering experience in multi-agent systems, NLP, and predictive ML. Shipped multi-module containerized platforms with microservices-ready architecture and enterprise-grade security. **3x hackathon winner.**

Technical Skills

Languages: Java, JavaScript, C++, Python

Frameworks & Technologies: Spring Boot, Spring Security, React 19, Next.js, Express.js, REST APIs

Databases: PostgreSQL, MongoDB, MySQL

Tools: Docker, Git, Maven, Postman, Linux, CI/CD

Core Concepts: DSA, OOP, Microservices - Hexagonal Architecture, RBAC, JWT/OAuth

Projects

CoinTrack – Multi-Broker Finance Platform [github.com/urvagandhi/cointrack] **Aug 2025 – May 2026**

- Designed and shipped a multi-broker investment platform with **45+ REST endpoints** and **8 modules** using **hexagonal architecture** to aggregate Zerodha, Angel One, and Upstox portfolios into a real-time P&L dashboard with 15-minute background synchronization and Dockerized deployment.
- Engineered an alternative asset management engine supporting **Mutual Funds, Gold/Silver, FD, PPF, and EPF**, integrating real-time pricing APIs and market-holiday web scraping for highly accurate live NAV calculations and portfolio analytics.
- Implemented an enterprise-grade security stack featuring **Google OAuth 2.0 SSO**, mandatory **TOTP 2FA**, **AES-256-GCM** encryption, JWT authentication with refresh-token rotation, Caffeine-based token blacklisting, and Bucket4j rate limiting.

Agent Paperpal – Agentic AI Manuscript Formatter [github.com/urvagandhi/TBD] **Mar 2026**

- Track Runner-Up – HACKaMINeD '26 (400+ teams, 2300+ registrations)**
- Led a 5-member team to build an agentic manuscript formatting platform using React 19, Python, CrewAI, Google Gemini 2.5 Flash and Office.js, automating compliance checks and formatting across APA, IEEE, Vancouver, Springer and Chicago journal standards.
- Developed a 4-agent AI workflow with a React web application, Microsoft Word Add-in and 7-dimensional compliance scoring system to streamline manuscript submission readiness for researchers.

FleetFlow – Fleet & Logistics Management System [github.com/urvagandhi/Odoo-Hackathon-26] **Mar 2026**

- 2nd Runner-Up – Odoo × Gujarat Vidyapith Hackathon '26**
- Built a full-stack fleet and logistics management platform using TypeScript, Express.js, React 19, PostgreSQL and Prisma ORM with 9 modules, 30+ APIs, 4-role RBAC, immutable audit logs, real-time Socket.IO updates and Docker Compose deployment.

RWEsearch – Healthcare Analytics Platform [GitHub] **Aug 2025 – Sep 2025**

- 1st Place – Health AI Hackathon 2025 (140+ teams)**
- Built a healthcare analytics platform using Python, Streamlit, Scikit-learn, XGBoost and TensorFlow to predict hospital readmissions at 30-, 60- and 90-day horizons through an interactive dashboard.
- Benchmarked Logistic Regression, Random Forest, XGBoost and Deep Learning models via a Smart Model Loader, enabling comparative evaluation and selection of optimal predictive models.

Education

Nirma University – Ahmedabad, Gujarat, India

B.Tech in Computer Science & Engineering | Minor: Adaptive AI

Aug 2023 – Present

CGPA: 8.83/10

Advait Vidhyaniketan

HSC – Gujarat Board (GSHSEB)

Jul 2021 – May 2023

Percentile: 99.28

Swami Vivekanand School

SSC – Gujarat Board (GSHSEB)

May 2021

Percentile: 96.92

Internships

Kautilyam – IT Product & Services

Backend Developer Intern

May 2026 – Jun 2026

Key Skills: Java, Spring Boot, ReactJS, MongoDB, DSA, Backend Development

- Worked as a Software Engineer Intern (Backend Development), contributing to the design, development, and maintenance of scalable web application.
- Implemented backend services, business logic, data-processing workflows, and database integrations.
- Collaborated with frontend developers and team members to deliver end-to-end software solutions.
- Worked with MongoDB databases for efficient data storage, retrieval, optimization, and management.
- Participated in software development lifecycle (SDLC) activities, including requirement analysis, development, testing, and deployment.
- Utilized Git for version control, code collaboration, and maintaining development workflows.
- Contributed to code reviews and followed software engineering best practices to ensure clean, maintainable, and production-ready code.
- Gained hands-on experience in backend architecture and deployment processes within a professional development environment.

Achievements & Competitive Programming

LeetCode: Contest Rating 1607 (Top 22.84%), 330+ DSA problems solved [leetcode.com/u/urva_gandhi]

Codeforces: Pupil (Max Rating 1307) [codeforces.com/profile/Urva_Gandhi]

CodeChef: 1-star Rated (1264) [codechef.com/users/urva_gandhi]

1st Place – Health AI Innovation Hackathon 2025 (140+ teams)

Track Runner-Up – HACKaMINeD 2026 (400+ teams, 2300+ registrations)

2nd Runner-Up – Odoo × Gujarat Vidyapith Hackathon 2026

Round 2 – Adobe India “Connecting the Dots” Hackathon 2025
